

NAISH

TORCH

SIZES: 6-8-10-12-14-16-18-20

Power freestyle moves are now the cutting edge of kiteboarding. The new Torch is ready to take you there. The fast response allows instant pop and the kite can spin on axis with minimized power for kite loops. Stable, solid power is predictably delivered for powered moves. The new Torch is user friendly and makes the most radical tricks attainable. A bold new look, the highest quality materials in the industry, and the most refined design will make the 2006 Torch turn heads.

PERFORMANCE CHARACTERISTICS

- Instant response, and pivotal turning.
- Increased depower for gusty conditions.
- Comes with the Shift System, Octopus Technology, and industry leading materials.

WHAT'S NEW IN DESIGN

- The refined profile enables the kite to fly faster than ever.
- The shift system technology allows for a smaller diameter LE and keeps the kite solid in the air.
- Bigger wing tips, a new profile, and new LE design make the kite incredibly fast turning.
- The gain in turning speed is especially noticeable in the bigger sizes.

WHAT'S NEW IN CONSTRUCTION

- Light weight wing tips with reinforcement just where it is needed.
- New Thermoform Bumpers.
- Industry leading materials and Naish quality.

TECHNICAL FEATURES

- 1) Octopus Technology:
 - The best single point inflation system on the market
 - One way valves that keep the pressure consistent in the struts and LE
- 2) Shift System including:
 - A new bar with optimized center hole for less bar pressure when cranking turns
 - New Trim Loop (QRTL) designed for added safety & easy release
- 3) New kitebag:
 - Better than your backpack! Carry your kite, board, MP3 player, pump, and everything you need for the beach
